To: All Beghelli Partners

**Subject: Discontinued: Sealed Beam Lamps & Rubber Heads**

Beghelli USA is officially discontinuing incandescent and halogen sealed beam lamps effective immediately. We will also be discontinuing the rubberized heads. We are making these changes to focus our efforts on lamps with new technology.

The Sealed beam lamps will now only be available in 6W LED for the AR heads.

Great alternatives to the sealed beam lamps are the SEA heads w/ MR16 LEDs and Testa (coming soon in new lower wattages).

Limited inventory is available. Please contact us if you have an outstanding project; we can assist in providing an alternative.

If you would like information on any of our products or services that we offer, please contact your Customer Service Specialist at 800-726-4316

We thank you for your continued support.

Sincerely,

Beghelli USA
