

# SanificaAria 30

sanitization

LOCAL CONTROL

1060f<sup>3</sup> per/hour

(3) SANITIZING SPEEDS

The **SanificaAria 30** provides complete room sanitization and is designed to operate in the presence of people. Using our patented UvOxy® technology, **SanificaAria** safely and effectively eliminates up to 99.99% of viruses, bacteria and spores without any filters, harmful UV-C exposure or Ozone generation.

**SanificaAria** draws air into a closed chamber via a variable speed axial fan. The air passes through the closed chamber that contains the UV-C cartridge. The air is sanitized within the chamber and then expelled clean and disinfected. This nearly silent process can operate 24 hours a day. The UV-C cartridge has a service life of 8000 hours or nearly one year. A visual reminder on the front panel alerts when a replacement cartridge is needed.

**SanificaAria 30** is ideal for use in hotels, restaurants, retail stores, offices, homes, and classrooms.

## ORDERING INFORMATION

<b>SA-30</b>	SanificaAria 30 portable, 25W, 120V, white cord & plug
--------------	--

## SPARE PARTS

<b>SAC-30</b>	SanificaAria 30 replacement cartridge lamp kit
---------------	--

## INSTALLATION

### WALL & CEILING

### FLOOR-STAND

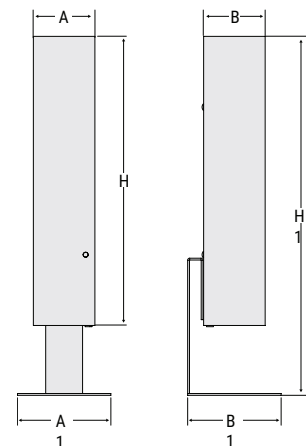

### FURNITURE OR SHELF

## TECHNICAL

**Purification Rate:** 1060 cubic ft / hour  
**Wavelength:** 254nm  
**UV-C power:** 18W  
**UV-C radiation power:** 5.5W  
**Unit Consumption:** 25W  
**Input voltage:** 120V
