# BEGHELLI AROUND THE WORLD

# BEGHELLI GROUP

---

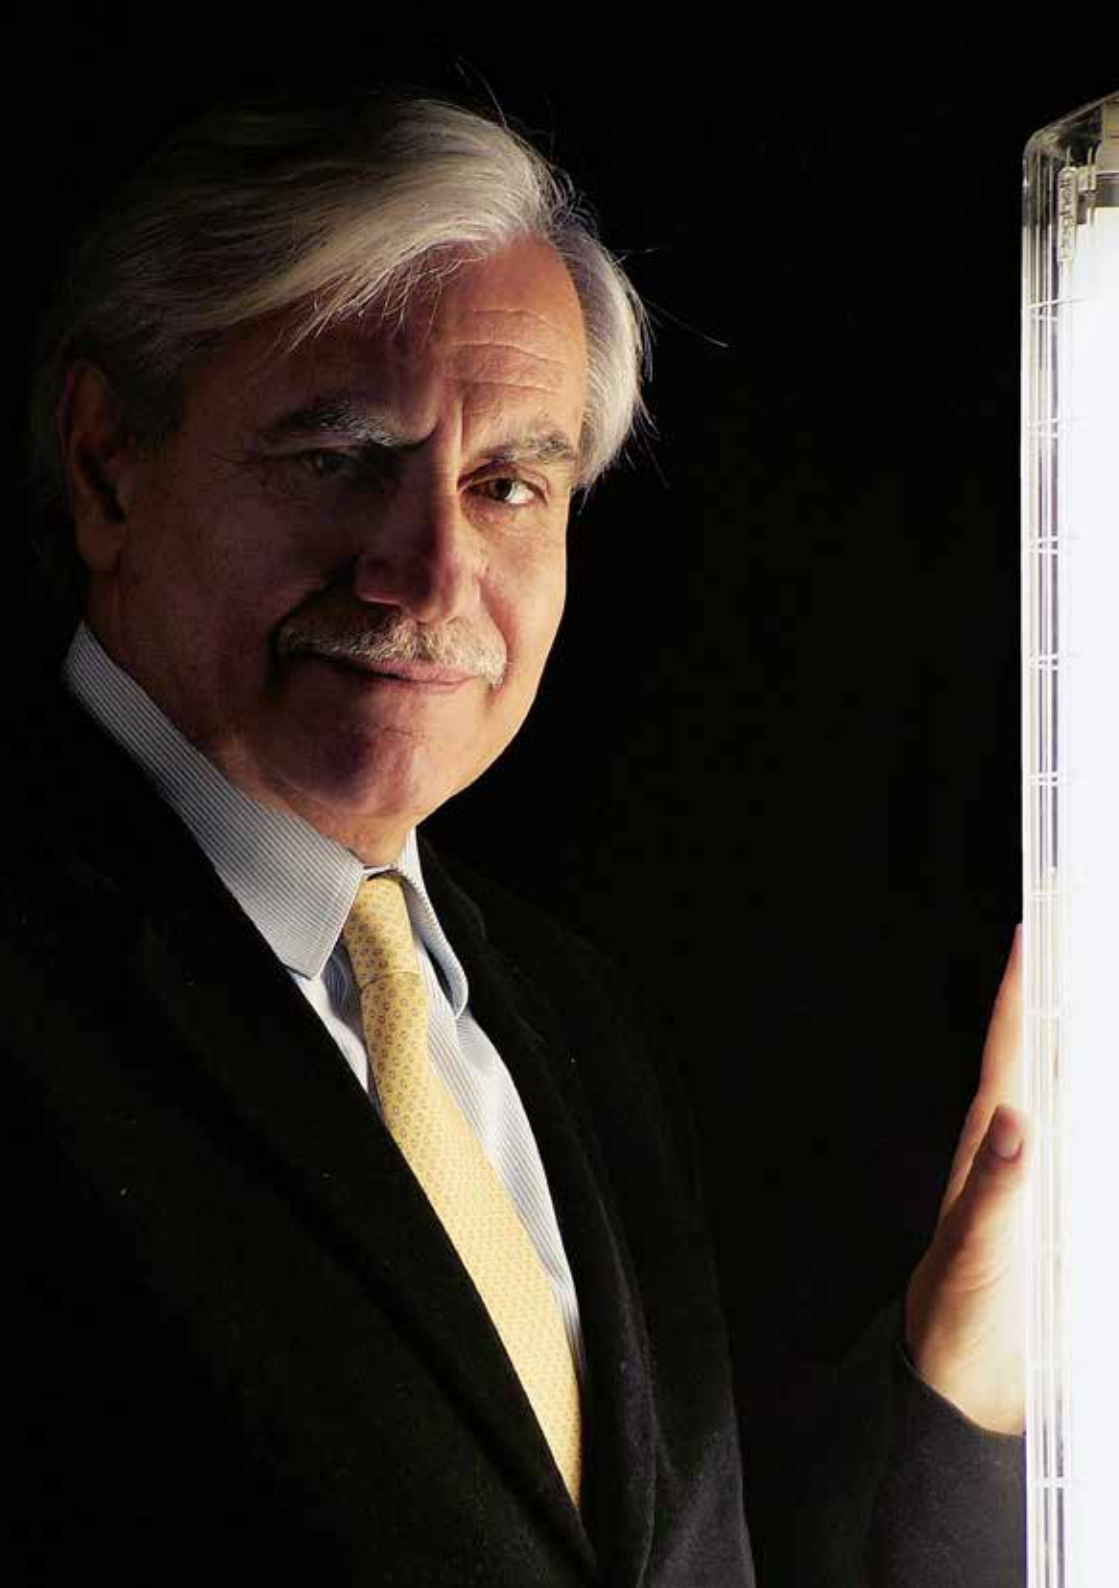

Founded in 1982 by Gian Pietro Beghelli, the Beghelli Group is focused in emergency lighting, energy saving lighting, and electronic domestic, industrial and personal safety and security systems.

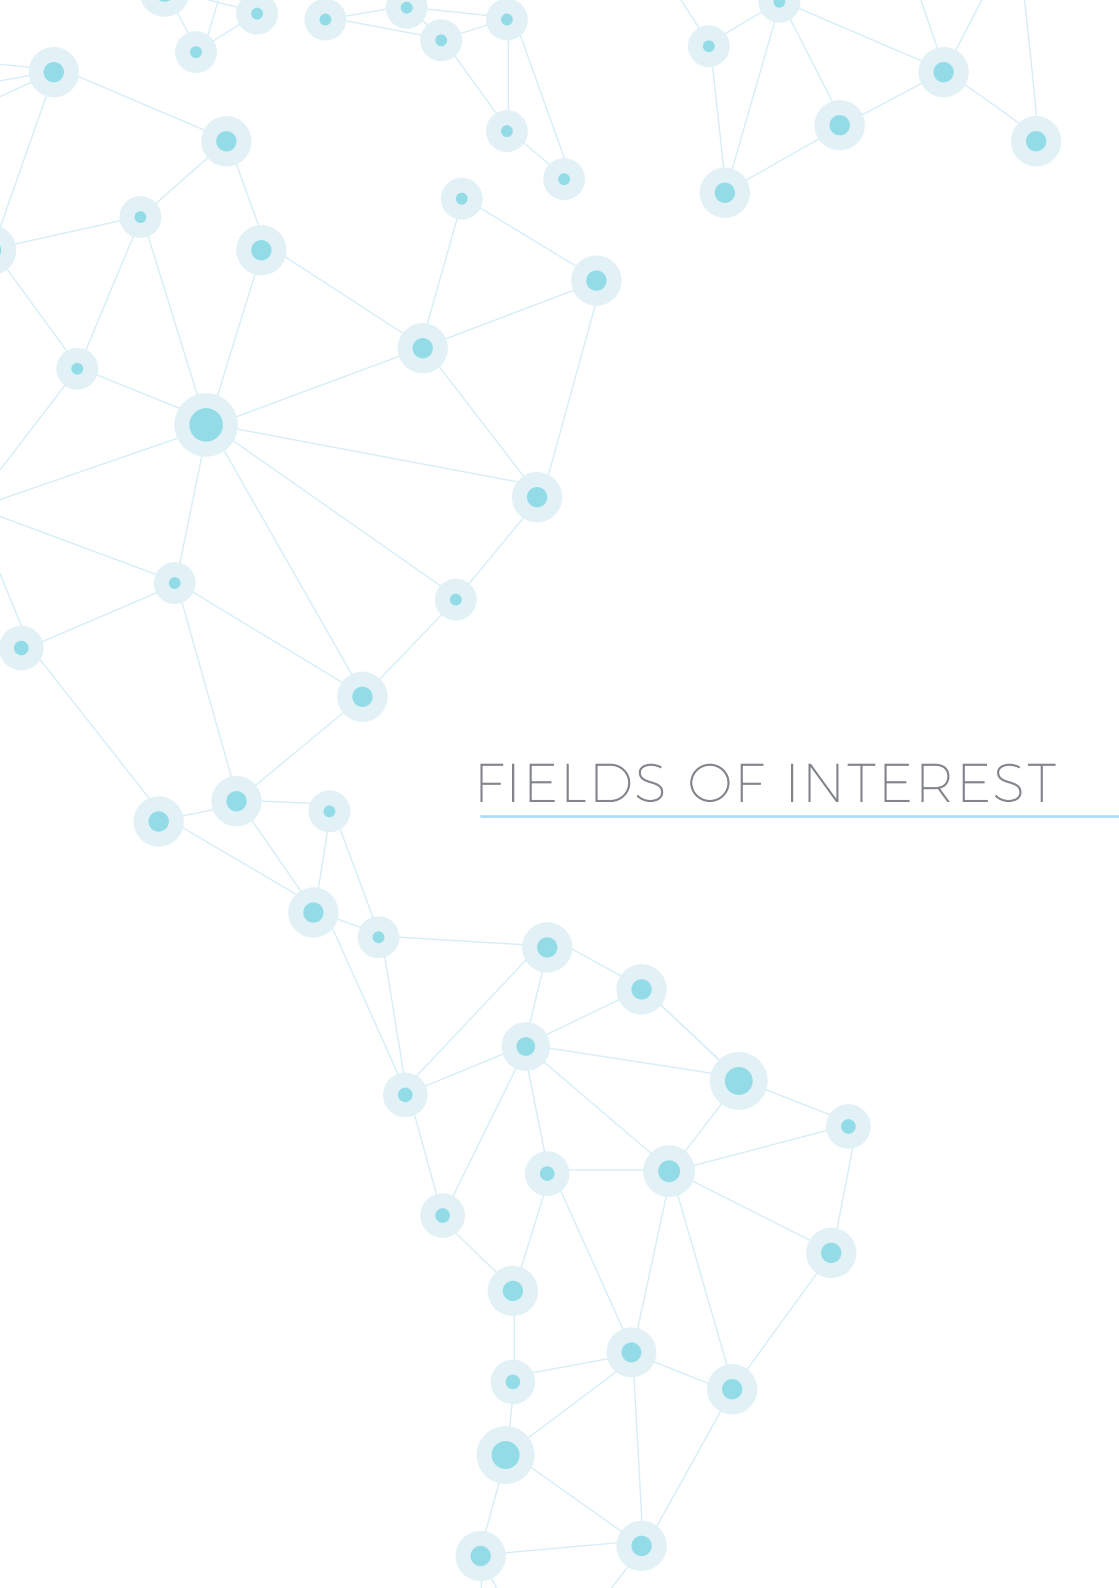

Beghelli, with its headquarters in Italy, is a global company that brings a global brand in the lighting industry. With professional expertise, the most innovative technologies, fully dedicated R&D teams and key project management, Beghelli has been able to bring its brand values to the four corners of the world.

The Group's international development is represented by its subsidiaries in Germany, Czech Republic, Poland, Hungary, USA, Canada, Mexico, China and Hong Kong.

Beghelli products are sold in more than 120 different countries worldwide.

CENTRAL BATTERY SYSTEMS  
FOR EMERGENCY LIGHTING NETWORKS

## Lighting

ENERGY SAVING LIGHTING SYSTEMS

LIGHT CONTROL SYSTEMS  
FOR INTELLIGENT BUILDINGS

## Home automation and security systems

## Led lamps and light sources

## Personal safety devices

## Consumer products

## SELF CONTAINED EMERGENCY LIGHTING FOR STAND ALONE AND NETWORK OPERATIONS

Beghelli manufactures a wide range of self-powered LED emergency lighting fixtures, confirming its commitment to modernity, energy saving and care for the environment. Particular emphasis is given to products with self diagnostic capability - either stand alone or remotely operated - which are the most advanced solutions to system testing and maintenance requirements. Direct operator verification is extremely demanding and time-consuming and, as such, self-diagnostic systems are essential in the emergency lighting sector and provide the foundations for the correct operation of any facility.

## CENTRAL BATTERY SYSTEMS FOR EMERGENCY LIGHTING NETWORKS

Beghelli's Central Battery Systems provide solutions to new market requirements of buildings' safety with exceptional flexibility and independent fixture's communications. With a reduced number of circuits, a minimal wiring and no batteries distributed in the network, the cost for maintenance are down to the minimum, including considerable reduction in plant design and installation. As an additional benefit, any change or extension can be planned and executed easily with increased flexibility and great further potential of savings.

## ENERGY EFFICIENCY AND HIGH AESTHETIC QUALITY IN LIGHTING SYSTEMS

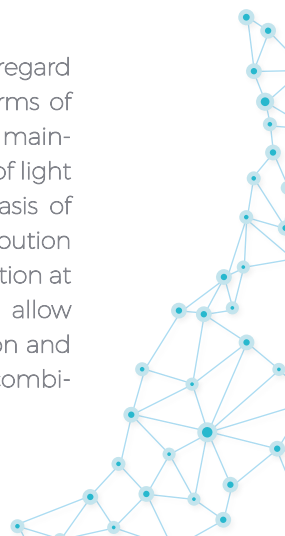

The Beghelli Group is proud of its great portfolio of state-of-the-art high efficiency lighting fixtures. With many years of expertise in lighting fixture design, with its products, Beghelli brings important energy savings features for any kind of installation. Beghelli products can be installed in several applications - from heavy industrial, to commercial, to institutional and tertiary, and many more.

## LIGHT CONTROL SYSTEMS FOR INTELLIGENT BUILDING

Beghelli systems meet systems efficiency requirements, both with regard to energy savings and reduced environmental impact, and in terms of optimisation of performance and visual comfort and reduction of maintenance costs. The new systems enable control and self-regulation of light sources in accordance with different time bands and on the basis of whether or not persons or vehicles are present, taking the contribution made by the natural light already present in a space into consideration at all times, thus preventing energy wastage. These developments allow three key factors - namely lighting technology, building automation and adaptability of light to the requirements of the individual - to be combined in perfect harmony.

## HOME AUTOMATION AND SECURITY SYSTEMS

Brain Beghelli system consists of many devices that thanks to integrated sensors (Light sensor, Acoustic sensor, temperature and humidity sensor, laser motion sensor) allow to perform various functions: security alarm; chromothermostat and heating regulations; home automation; consumption control (electricity, water, gas); coloured light; emergency light; night light and many other.

## LED LAMPS AND LIGHT SOURCES

From professional to domestic application there is always a Beghelli LED lamp that can be selected and installed.

Modern and technological, the range of Beghelli light sources includes led lamps able to achieve the highest efficiency standards and energy savings in the industry. Their conventional shape and dimension make them fit any kind of light fixture. The colour temperature and the peculiar spectrum of these lamps allow a close comparison to the light emitted by the excellent light source by definition: the sun.

## PERSONAL SAFETY DEVICES

Personal safety devices like Beghelli "SalvalavitaGO" are designed specifically for those who practise sport alone in isolated areas and wish to do so in the safest of circumstances. It is able to be connected to a smartphone, send calls and emergency notifications to the numbers memorised on the application and communicates the geographical position of the person wearing the device, to quickly activate the logistics of rescue.

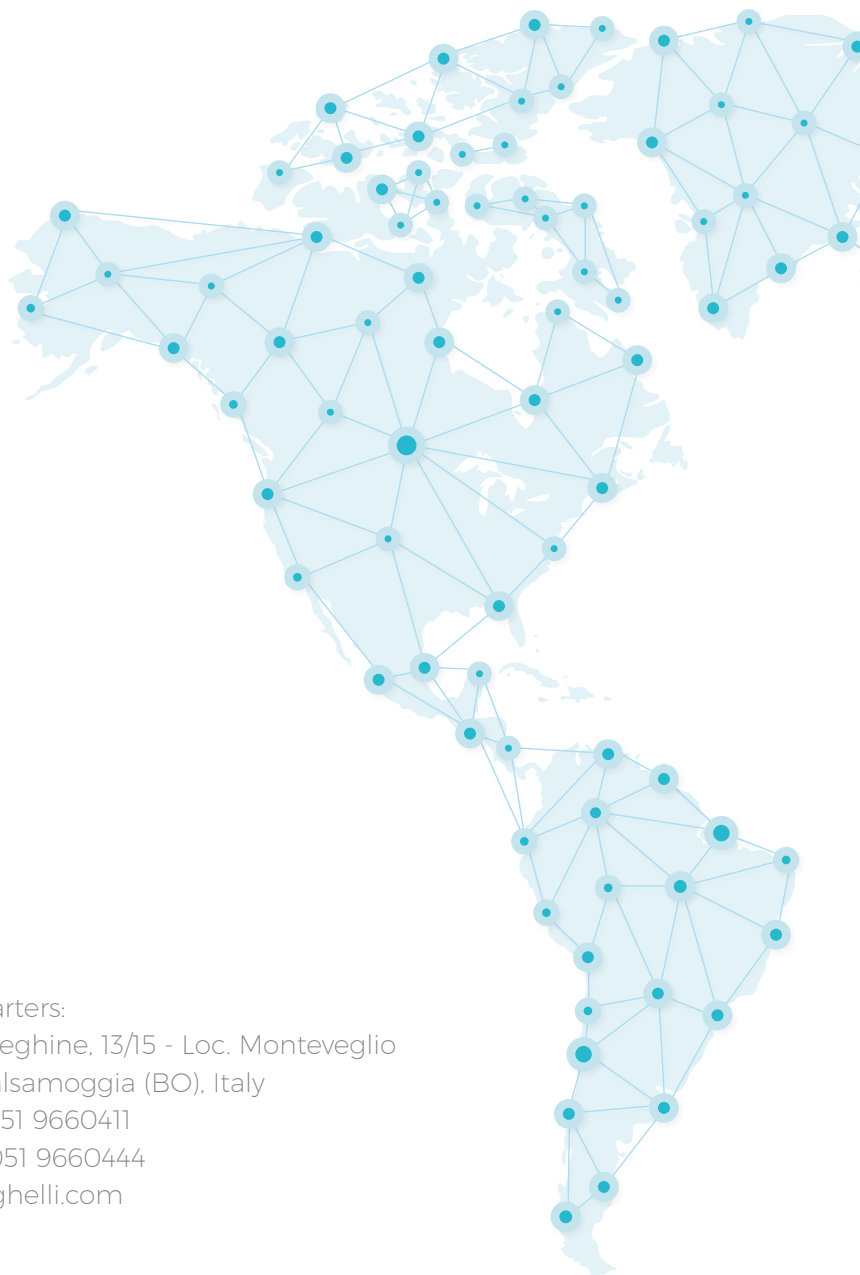

## CONSUMER PRODUCTS

Safety for the environment and the people: these are Beghelli consumer division keywords, driving the research and development of innovative products dedicated to everyday life.

LED energy saving light bulbs, personal safety and water treatment devices, high efficiency rechargeable batteries are just some of the product categories available, all built under our commitment for a better life in a healthier world.
